

Application No.: 10/762,891  
Filed: January 21, 2004  
AMENDMENT AND RESPONSE TO FIRST OFFICE ACTION

**Amendments to the Specification**

Please replace paragraph [0038] of the original specification with the following re-written paragraph:

[0038] The call forward device 10 provides call forward services through a base unit 150 requesting that the wireless device 100 send SMS messages, specifically, call forward requests. This conversion is performed by interfacing with SS7 network elements and translating call forwarding requests through a call forward server ~~250~~ 350, which connects to the STP ~~370~~ 380.

Please replace paragraph [0057] of the original specification with the following re-written paragraph:

[0057] According to this embodiment of the invention, it is also possible to send the call forward instructions from the POTS telephone 301, across the PSTN connection. Such actions could be performed using the triggering events described herein and conventional methods for initiating call forwarding in a POTS system. For example, the Bluetooth enabled base unit 155 may also be communicatively connected to the POTS telephone 301 in a conventional manner. In operation, the Bluetooth enabled base unit 155 could issue call forward instructions to the POTS telephone 301. In response to the call forward instructions, the POTS telephone ~~301~~ may ~~may~~ may issue call forward AT commands to a PSTN.
